- 07 2 Live Case Studies

We Don't Just Run Ads. We Build Revenue Machines.

"Our vision is simple: take a great product to the right market, with the right message, at the right time."

*CG-VAK has the product.
We bring the market."*

30+ member in-house team

Strategists, media buyers, funnel architects, AI specialists.
No outsourcing, no freelancers.

5 active markets

USA, Singapore, Malaysia, UAE, India — live campaigns, live results, live accountability.

Zero fluff. Full accountability.

We measure cost per lead, cost per close, and ROI — every single week, shared with clients.

CG-VAC – MARKET RESEARCH

THE OPPORTUNITY

The US Has a Problem CG-VAK Was Built to Solve

1.4M

Tech roles unfilled
in the US today

54%

US companies pick
India for offshore dev

\$179B

Offshore dev market
size in 2025

40–70%

Cost saved vs. hiring
locally in the US

"The US doesn't lack demand for what CG-VAK does. It lacks the awareness that CG-VAK exists. That's the only problem we need to solve — and it's exactly what Digifyce does for a living."

25 Years of Delivery. Now Going on Offence.

Founded 1994 · ISO-Certified · Listed Company · US presence +1 908 737-7425

Founded 1994

One of India's original software exporters. Listed company, public governance, full investor transparency. Not a startup. Not a fly-by-night vendor.

US Presence — NJ

Operating US phone line, established relationships. Not a distant India vendor — a partner with boots on the ground in New Jersey.

AI-First Since Before It Was Trendy

In-house AI/ML, Bioinformatics AI, Insurance AI — built and deployed across real client environments for years.

ISO-Certified Delivery

Quality policy, information security, CMMI-aligned process. Every enterprise procurement checklist — ticked.

microGCC™ — Proprietary Model

US companies get a dedicated offshore captive team with zero overhead. Nobody else has built this model at CG-VAK's price point.

Full-Stack Service Portfolio

AI/ML to mobile, web, ERP, penetration testing, data curation — one trusted partner, end-to-end coverage.

Where CG-VAK Wins — and Why Others Can't Copy It

Capability	CG-VAK	Typical Offshore	US-Local Agency	Indian IT Giant
25+ year track record	✓	Varies	✗ US-only	✓ but impersonal
In-house AI/ML team	✓ In-house	Rarely	Outsourced	✓ but \$\$\$\$
Insurance AI product	✓ Built & live	✗	✗	✗
microGCC™ model	✓ Proprietary	✗	✗	✗
US phone + office NJ	✓	✗ or virtual	✓	✓ but generic
Cost vs. US hiring	40–70% less	40–60% less	0% advantage	20–30% less
Bioinformatics + AI data	✓	✗	✗	Rarely

What to Lead With in the US — Ranked by Opportunity

TIER 1 — LEAD SERVICES (Maximum demand, strongest differentiation)

AI / ML Solutions

87% of US engineering heads fund GenAI pilots. CG-VAK delivers what they can't hire for locally — at 40–60% of the cost.

Offshore Software Dev

1.4M unfilled US tech roles. 54% of US companies choose India first. CG-VAK's 25yr track record is the trust signal that closes deals.

Hyper Data Curation

Every AI team needs training data at scale. This is a rare specialty. High stickiness once the pipeline is running.

Outsourced Product Dev

Mid-market wants MVP in 60 days, not 12 months. Fixed-scope model removes procurement risk entirely.

TIER 2 — VERTICAL UPSELLS (Sector specialisations that create long-term lock-in)

AI Insurance Solutions

BFSI = 30% of all IT outsourcing. CG-VAK's ready-made insurance AI is a door-opener in NY & IL that competitors can't match.

Bioinformatics + AI Data

Healthcare = 23% of outsourcing. Boston & NC biotech clusters are underserved and have generous R&D budgets.

Pen Testing + QA

CMMC mandates driving cyber outsourcing surge in VA. Easy add-on once a dev engagement is live.

Custom Software + ERP

Mid-market modernisation wave. Attach to offshore deals. TX and OH SMBs have both budget and urgency.

3 Phases. 12 States. One Direction.

Phase 01 · BEACHHEAD

Month 1–6

STATES

California · New York · Texas

WHY THESE MARKETS

CA = highest AI startup density globally. NY = BFSI capital — insurance AI lands perfectly, CG-VAK already has NJ roots. TX = fastest-growing tech hub, cost-conscious buyers who respond well to offshore value.

KEY SERVICES

- › AI/ML Solutions
- › Offshore Dev
- › AI Insurance (NY)
- › Custom ERP (TX)

Goal: 5–10 US clients. First case studies. Real proof.

Phase 02 · SCALE

Month 7–18

STATES

WA · FL · IL · MA · VA

WHY THESE MARKETS

WA = Amazon/MSFT ecosystem — AI engineers impossible to hire. IL = insurance capital of US. MA = Harvard/MIT biotech cluster, uniquely matched to Bioinformatics. VA = federal cyber mandates drive pen testing demand.

KEY SERVICES

- › Bioinformatics AI (MA)
- › Pen Testing (VA)
- › E-commerce (FL)
- › Fintech (IL)

Goal: 25–40 US clients. Vertical playbooks. Conference presence.

Phase 03 · AUTHORITY

Month 19–36

STATES

GA · OH · CO · NC

WHY THESE MARKETS

GA = fintech south (Atlanta payments scene). OH = ERP modernisation wave across manufacturing belt. CO = fast-growing SaaS hub outside CA. NC = pharma/biotech Research Triangle — Bioinformatics Phase 2.

KEY SERVICES

- › microGCC™ launch
- › US office (NJ or TX)
- › SOC2/ISO push
- › SI partnerships

Goal: US brand recognition. Inbound pipeline. Enterprise contracts.

CG-VAC – BUYER PERSONA

Startup CTO / Co-founder

Series A–C Tech Companies · CA, TX, CO, WA, NY

PAIN POINTS

- 
- Hiring a senior AI engineer takes 4–6 months and costs \$300K+/yr
 - Board wants AI in the product now — no internal ML team to build it
 - Burn rate too high to staff a full US dev team
 - Missed product milestones because of resource gaps

ENTRY POINT

AI/ML Development + Offshore Dev POC

Offer a 4-week fixed-price AI prototype sprint. Remove the risk entirely. When they see the output quality and speed, the retainer conversation becomes straightforward.

THE PITCH

"A dedicated AI team at 40–60% of US cost. Your roadmap, moving — without a 6-month hiring cycle."

CROSS-SELL & UPSELL JOURNEY

Month 1–3	Entry	AI/ML sprint or offshore dev POC — fixed price, 4–8 weeks
Month 3–6	Upsell	Add Hyper Data Curation — training data pipelines for live models
Month 6–12	Expand	Full product dev + QA testing as ongoing retainer
Month 12+	Lock-in	microGCC™ — dedicated offshore captive team model

IT Director / VP Engineering

Mid-Market Enterprise · NY, IL, TX, VA, WA

PAIN POINTS

- Dev backlog has a 3-month wait — internal team is completely maxed out
- Past offshore vendors delivered bugs and missed deadlines — trust is low
- Risk-averse procurement: needs certs, references, SLAs signed before any engagement
- CTO scrutinises every vendor — zero tolerance for surprises or scope creep

ENTRY POINT

Offshore Staff Augmentation — 1 bounded project pod

Lead with process, not price. Present ISO certs, a dedicated PM, weekly reporting, and a clear SLA. Start with 3–5 devs on one bounded project. Prove reliability before scaling.

THE PITCH

"We become an extension of your team. Dedicated PM, weekly updates, guaranteed SLAs — zero surprises."

CROSS-SELL & UPSELL JOURNEY

Month 1–3	Entry	1 offshore pod (3–5 devs) on existing backlog project
Month 3–6	Upsell	Add QA and Pen Testing as a service layer on the live product
Month 6–12	Expand	Expand pod + Custom ERP or Web App modernisation
Month 12+	Lock-in	microGCC™ dedicated team + AI/ML layer for product intelligence

Insurance CDO / CTO

Insurance Carriers & MGAs · NY, IL, TX, FL, GA

PAIN POINTS

- Legacy core systems slowing underwriting speed from hours to days
- Fraud losses rising — no AI detection in place, claims team overwhelmed
- Board wants an AI roadmap but there's no internal ML engineering team
- Any AI solution must be fully compliance-ready — regulatory pressure is real

ENTRY POINT

AI Insurance Solutions — Fraud Detection Pilot

Run a 6-week pilot on historical claims data. Show measurable fraud detection lift. The ROI pays for itself in the first month. The CDO looks like a hero to the board.

THE PITCH

"Purpose-built AI for insurance — fraud detection, underwriting AI, claims triage. Deploy in 6 weeks."

CROSS-SELL & UPSELL JOURNEY

Week 1–6	Entry	Fraud detection pilot on historical claims dataset
Month 2–6	Upsell	Expand to underwriting AI + full claims automation
Month 6–12	Expand	Offshore dev team for core system modernisation + API layer
Month 12+	Lock-in	Hyper Data Curation for model retraining + Pen Testing for compliance

Biotech Head of R&D

Pharma · Genomics · CROs · MA, NC, CA, NJ

PAIN POINTS

- Genomic datasets growing faster than the team can process or label them
- Bioinformatics engineers take 12+ months to hire at \$200K+/yr salary
- Drug discovery AI pipeline bottlenecked on data engineering, not science
- NIH/FDA compliance adds legal complexity to any tech outsourcing decision

ENTRY POINT

Bioinformatics AI + Hyper Data Curation POC

A 4-week POC on their existing genomic dataset. Most offshore firms cannot credibly pitch bioinformatics. CG-VAK can. The specificity of the pitch alone creates instant credibility.

THE PITCH

"We've built genomic and multi-omics AI pipelines at scale. 4-week POC on your data — zero commitment."

CROSS-SELL & UPSELL JOURNEY

Week 1–4	Entry	Bioinformatics pipeline POC on existing genomic/clinical data
Month 2–6	Upsell	Hyper Data Curation — ongoing labelled data for model training
Month 6–12	Expand	Custom AI model dev for drug discovery or compound screening
Month 12+	Lock-in	Pen Testing (FDA/NIH compliance) + offshore dev for R&D tooling

SMB Owner / Operations Lead

Retail · Logistics · Services · TX, FL, OH, GA

PAIN POINTS

- Everything is manual — no systems, no automation, no reporting, no visibility
- Tried 2 offshore vendors before — bad experience, wasted money, burned trust
- No in-house dev, no technical co-founder, no IT team at all
- Tight budget — needs to see ROI in 60 days or the conversation ends there

ENTRY POINT

Fixed-Price Web App or E-commerce Build

Remove all risk with a fixed price, fixed timeline, clear deliverable. Deliver value in 30–60 days. The first win builds the trust for everything that comes after.

THE PITCH

"Enterprise-quality software at SMB prices. Fixed scope, guaranteed deadline, zero surprises."

CROSS-SELL & UPSELL JOURNEY

Month 1–2	Entry	Shopify / WooCommerce store or Mobile App — fixed price
Month 2–4	Upsell	Web redesign + performance optimisation + mobile-compatible site
Month 4–9	Expand	Custom ERP or workflow automation to cut manual operations
Month 9+	Lock-in	AI automation features + ongoing offshore dev retainer

CG-VAC – GTM STRATEGY

How We Reach, Qualify & Convert Each Persona

Lead Gen Sources	CRM Repository	Qualify via Flow	Sales Qualified Lead	Follow-up Strategy
› Google Ads (search + display) › LinkedIn paid + organic › Meta Ads retargeting › Webinars + Seminars › SEO content engine	› All leads auto-captured › Tagged: persona + source › Lead score assigned › Pipeline segments created › Full history tracked	› WhatsApp 5-day sequence › Email nurture series › Behaviour-based scoring › AI chatbot qualifier › Webinar attendance check	› Score 60+ threshold hit › Matched to ICP persona › Discovery call booked › Demo scheduled in 48hrs › Proposal template ready	› Day 1: personalised video › Day 3: relevant case study › Day 7: ROI calculator › Day 14: CEO direct touch › AI agent nudges daily

AI Agent Layer — Automated WhatsApp nudges · Email triggers · Lead scoring · Abandoned cart recovery · Re-engagement sequences · All running 24/7

Channel-by-Channel Reach Strategy

Google Ads

- › Search: 'offshore AI team India', 'custom software dev US'
- › YouTube: 60-sec explainers targeting CTO/VP roles
- › Performance Max for B2B lead form conversions
- › Display: retarget all website visitors with case study ads

LinkedIn

- › Organic: CEO thought leadership — 3× per week minimum
- › Paid sponsored posts to CTO, IT Director, CDO titles
- › Sales Navigator: 50 targeted connection requests per week
- › InMail: 3-touch cold outreach sequence with case study

Content & SEO

- › SEO: 'offshore dev India', 'AI insurance solutions US'
- › Free downloads: ROI calculator, vendor evaluation template
- › Webinars: monthly, persona-specific (CTO / Insurance CDO)
- › Case studies: 2 per quarter with US client outcomes

Meta / Instagram

- › SMB owners: Facebook retargeting + lookalike audiences
- › Video testimonials from existing US clients
- › Carousel ads: before/after delivery timeline stories
- › Lead form ads for webinar and event signups

ChatGPT & AI Search

- › ChatGPT Ads: 'find offshore dev firm from India'
- › Perplexity: SEO-optimised answer-format content
- › AI Overview optimisation for Google AI snippets
- › Bing Ads: underpriced, high-intent B2B buyer pool

Inbound / Organic

- › Clutch.co: top-rated listing + systematic review strategy
- › G2 + GoodFirms profile fully optimised with keywords
- › GitHub: open-source AI tools building developer trust
- › Podcast guest appearances on SaaS and offshore dev shows

The Stack That Turns Marketing Spend Into Revenue

Acquisition

- › Google Ads · Meta Ads · LinkedIn Ads
- › ChatGPT Search Ads · YouTube pre-roll
- › SEO content CMS (WordPress / Webflow)

Landing & Capture

- › GoHighLevel / Unbounce landing pages
- › Hotjar heatmaps + A/B testing
- › Lead forms → instant WhatsApp trigger

CRM + Nurture

- › HubSpot / GoHighLevel CRM pipeline
- › Email sequences (ActiveCampaign)
- › WhatsApp automation (Interakt / WATI)

Qualification

- › AI chatbot (Intercom / Tidio AI)
- › Behaviour-based lead scoring engine
- › Webinar platform (Zoom / StreamYard)

Sales Closure

- › Video proposals (Loom personalised)
- › E-sign (DocuSign / PandaDoc)
- › Calendly booking + CRM auto-log

Retention & LMS

- › Client portal / LMS (Thinkific / custom)
- › NPS + client health score tracking
- › Referral engine — automated incentives

BUDGET & ROI PROJECTIONS

What to Spend, Where to Spend It, What to Expect Back

Persona / Geo	Budget/mo	Channel Mix	Leads	Conv%	Closes	Avg Deal	Month 3	ROI
Startup CTO · CA/WA	\$3,000	LinkedIn 60% + Google 40%	45	8%	3–4	\$15K/mo	\$45K+	15×
IT Director · NY/IL/TX	\$2,500	LinkedIn 70% + Google 30%	35	10%	3–4	\$20K/mo	\$60K+	24×
Insurance CDO · NY/IL	\$2,000	LinkedIn 80% + Events 20%	20	15%	3	\$30K/mo	\$90K+	45×
Biotech R&D · MA/NC	\$1,500	LinkedIn 90% + Content	15	12%	2	\$25K/mo	\$50K+	33×
SMB Owner · TX/FL/OH	\$2,000	Google 50% + Meta 50%	80	5%	4	\$5K/mo	\$20K+	10×
TOTAL — Month 3	\$11,000	Blended across channels	195	7.5%	15–18	Blended	\$265K+	24×

Other High-Potential Markets in the Pipeline

Singapore

Digifyce has live proof here — real estate REI method delivered 8× close rate. Fintech regulation is progressive. English-first. Indian offshore fully trusted.

Services: Fintech AI · Custom Software · Bioinformatics

Avg deal: \$15–30K USD. High trust in India-delivered tech.

United Kingdom

Post-Brexit talent shortage mirrors the US. Lloyd's insurance market is massive. Fintech sandbox culture. Major UK banks already use Indian IT at scale.

Services: AI Insurance · Custom Software + ERP · Offshore Dev

Avg deal: £20–50K. Compliance-ready vendors command premium.

Australia

Fastest growing offshore tech buyer outside US/UK. Mining and agriculture sectors driving custom software demand. Indian IT trusted at enterprise level.

Services: Custom Software · Mobile Apps · AI/ML for resources

Avg deal: AUD 30–80K. Low competition from Indian mid-size firms.

UAE / Gulf

Vision 2030 driving massive tech investment across the Gulf. AI regulation progressive. Indian professionals dominant — cultural alignment is strong. Fast decisions.

Services: AI/ML Solutions · Custom ERP · Offshore Dev + Pen Testing

Avg deal: \$25–100K. High budget, faster closure than Western markets.

DIGIYCE – CASE STUDY

From Zero Marketing to 1,000+ Enquiries / Month

N-400 & I-90 Immigration Form Processing · United States

The Problem

Client had a genuinely good product — fast, reliable N-400 and I-90 form processing, online and offline. But zero marketing infrastructure. No website strategy, no paid campaigns, no funnel. Good product, invisible business.

What We Built

Complete digital ecosystem from scratch: high-converting landing page, real-time chatbot, Hotjar heatmap optimisation, Google and Meta paid campaigns, and a GoHighLevel CRM pipeline to qualify and close leads automatically.

Tech Stack

Custom landing page · Hotjar heatmaps · Real-time chatbot · Google Ads · Meta Ads · GoHighLevel CRM · Automated WhatsApp follow-up sequences · Lead scoring + qualification

1,000+

Enquiries/month

+25%

Growth month-on-month

25%

Closure rate at \$999/close

25%

Net profitability

8× More Closures. Same Budget. A Completely New Method.

Top Real Estate Agent · Singapore Residential & Investment Market

The Problem

One of Singapore's top agents was stuck in a traditional lead gen loop — cold calls, property portals, referrals. High volume of unqualified leads, low conversion, exhausted team. The method wasn't broken. It was just completely outdated.

The REI Method

We built a proprietary webinar methodology — REI (Real Estate Investment) — pulling qualified buyers into a free educational event. The webinar pre-sold the agent's expertise, filtered unqualified attendees, and primed serious buyers before any sales conversation began.

Full Stack Used

Google Ads · YouTube pre-roll · Meta Ads · SEO content · Webinar funnel (Zoom + StreamYard) · Email nurture · WhatsApp follow-up · GoHighLevel CRM pipeline · Retargeting sequences

POA FOR CG-VAC

The 5 Things We Do in Week One

01

Define ICP & Phase 1 persona

Agree on which 2 of the 5 personas we go after first — and exactly which US states. No spread, no dilution of budget or attention.

02

Audit all existing CG-VAK assets

Website, case studies, testimonials, LinkedIn page, Clutch listing. Know what we have and identify gaps to fill within 2 weeks of kickoff.

03

Set up CRM and lead tracking

No paid campaign starts without a place to capture, score, and manage leads. GoHighLevel or HubSpot — configured and live before first spend.

04

Build 2 US-ready landing pages

One for AI/ML, one for Offshore Dev. Designed for a US buyer — different copy, different social proof, different call-to-action than the current site.

05

Launch first campaign in Week 2

LinkedIn InMail to 100 CTOs + Google search for 'offshore AI development India'. Week 3 review call with real data on what's working.

DIGIFYCE CONFIDENCE ON POWERFUL SYSTEMS

We Built the Dashboard Before We Pitched the Strategy

CMO Dashboard — Live at cmo-dashboard-ten.vercel.app

A real-time command centre we built to track every campaign, every channel, and every creative across all client accounts simultaneously.

9 Active Modules — Always Running

Brand Manager · Rule Engine · Analytics · Creative Performance · Competitor Tracking · Budget Pacing · Reports — all automated, all live.

AI Suggestions & Rule Engine

The system flags what's working and what's not — automatically. No gut feel. No guessing. Every decision backed by scoring models built from live data.

The Result: We Know What Converts Before We Spend

We don't test with your budget. We bring proven frameworks, then refine with data. That's why our campaigns outperform generic agencies from week one.

CG-VAK has the product. Digifyce brings the market.

The US tech talent gap is not closing. The demand for what CG-VAK delivers is not slowing down.

The only variable is whether CG-VAK is visible when the right buyer is looking.

That's our job. Let's get to work.

Ready to start?
